

EDUCATION

Bachelor of Science - Computer Science

University of Wisconsin - Milwaukee

Aug 2020 - Dec 2023

Milwaukee, WI

SKILLS

Programming Languages Java | Python | SQL

Technologies Spring | Spring Boot | Kafka | Azure | Dynatrace | GitHub Copilot | Mongo | Kubernetes

EXPERIENCE

Schneider National

Nov 2023 - Present

Software Developer I - II

Green Bay, WI

- Designed, built, and maintained Spring Boot microservices supporting large-scale enterprise applications with high availability.
- Developed RESTful APIs leveraging Spring Web and Spring Data JPA to support transactional and event-driven workflows.
- Utilized Python to automate repetitive workflows, improving efficiency and reducing manual effort.
- Wrote clean, modular, and well-documented code following the principles of SOLID and enterprise development.
- Collaborated with cross-functional teams to deliver high-quality software solutions, ensuring alignment with project requirements.
- Drove end-to-end delivery of integration features, from concept to production deployment and after-release validation.
- Took ownership of critical integration projects, ensuring delivery on time to meet the needs of the business

May 2023 - Aug 2023

Software Developer Intern

Green Bay, WI

- Developed React-based UIs for engaging and responsive web applications.
- Implemented backend processes using Java Spring Boot for robust and scalable functionality.
- Utilized Python to create automated scripts, streamlining operations and reducing time constraints for time-sensitive changes.
- Supported knowledge sharing and accessibility by contributing to the company wiki's documentation efforts.

NOTABLE PROJECTS

Schneider Mastermind Integration

Jan 2024 - Present

Backend Developer

Green Bay, WI

- Served as a core developer on the organization's top strategic tech initiative.
- Developed and enhanced the inbound and outbound integrations with the Mastermind API's from Mastery.
- Back-end development using Java Spring Boot framework utilizing micro-service architecture and Apache Kafka for seamless communication between microservices.
- Co-led initiatives to enforce and document best coding practices, ensuring high-quality code was consistently delivered to production.
- Contributed to enterprise-wide application consolidation efforts, streamlining business processes and improving user experience across departments.

AI Startup Point of Value Integration

July 2025 - Present

Project Lead

Green Bay, WI

- Architected and executed the testing phase from both functional and technical perspectives.
- Led collaboration between internal and external teams to reach the "Point of Value" milestone.
- Worked directly with senior leadership across the organization to secure resources and drive alignment.
- Led troubleshooting and performance optimization efforts to ensure seamless execution throughout the Point of Value phase.
